

Fire and Smoke Safety Guide

Approved worker rules and site regulations from the SentinelLoop knowledge base. These instructions support factory safety practice. They do not replace trained emergency responders or a competent person's isolation and repair work.

Immediate worker actions

1. Move away from flames, heavy smoke, or increasing heat.
2. Warn nearby workers and follow the site's emergency alert process.
3. Use the nearest safe exit if the area is becoming dangerous.
4. Do not enter or return to a smoke-filled or burning area.
5. Keep away from equipment, fuel, or materials involved in the fire.
6. Go to the designated safe area if evacuation is required.
7. Report anyone who may still be inside the affected area.

Site regulations

1. Keep evacuation routes, fire doors, and assembly points clear at all times.
2. Do not block fire extinguishers, hose reels, alarm call points, or emergency exits.
3. Combustible waste, packaging, and oily rags must be stored in approved containers.
4. Hot work such as welding or grinding requires a permit and a fire watch where required.
5. Fuel, solvents, and gas cylinders must be stored away from ignition sources.
6. Do not use lifts during a fire or smoke emergency unless directed by emergency staff.
7. Close fire doors behind you; do not wedge them open.
8. Report damaged alarms, missing extinguishers, or blocked exits immediately.
9. Smoking is allowed only in designated outdoor areas, never near flammables.
10. After an alarm, do not re-enter until the all-clear is given by the emergency team.

Worker duties

1. Know your nearest exit, secondary exit, and assembly point before starting work.
2. Raise the alarm as soon as fire or smoke is seen, even if it looks small.
3. Assist others to leave only if you can do so without entering the danger zone.
4. Account for your work group at the assembly point and report missing persons.
5. Follow the site emergency plan and any instructions from wardens or officers.

Prohibited actions

1. Do not fight a developing, spreading, or electrical fire unless you are trained to do so.
2. Do not hide, disable, or ignore fire alarms.

3. Do not go back for tools, phones, or personal belongings during evacuation.
4. Do not use water on oil, chemical, or electrical fires.

Always follow instructions from trained safety or emergency personnel.
